Subject: Septic Inspection Meeting

Dave

You will recall that at the end of the meeting we held with the four Councils in February on the subject of septic inspections there was agreement that we would meet again in the fall. Since that meeting the Environment Council has collected a good deal of information on the topic, including how several Townships in Ontario are approaching the issue..

Our sense of the next meeting is that we should make this information available to the participants, as well as provide time to ask questions and to clarify any areas that are not clear.

We will invite both Bryan Weir from the County and Kathleen Shepherd from the County Health Unit to attend the meeting so that they can explain responsibilities from their point of view

At the end of the meeting we would explain to each Township that we will be contacting them before mid-December to hear their position on septic inspections.

Given that this meets your approval would it be possible for you to organize the meeting (as you did last time) before the end of October?

Thank you.

Rob
